DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,2,6-11,13,16-18,20,21 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Sachs et al.

3. Sachs et al disclose a method and apparatus of preparing a three-dimensional object built up by layers of powder bonded together at specific locations on each layer by binder. See column 4, lines 18-32. The binder may be hardened at the time it is applied by heating using hot air, microwave or infrared energy. See column 8, lines 4-17. The binder is applied using piezoelectric force (column 6, line 29).

Allowable Subject Matter

4. Claims 3-5,12,14,15,19 and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not suggest applying the color after the material is bound. Color is usually added with the binder. The prior art does not suggest the arrangement of the binder applying device, layer formation device and the energy supplying device.
